# NOTE:

The current version of the Chroma-Q range uses a "digital" control card, a binary DMX address switch and a different method of gel string calibration and fixing. Please read this manual and the gel fitting supplement before using the product.

#### **Product Overview**

The Chroma-Q is designed to be one of the most reliable colour changers available. The utilization of digital circuitry and high technology composite materials, produces an affordable colour changer which is capable of scrolling gel strings of various lengths from 2 to 16 colours.

The Chroma-Q is designed to give years of trouble free use, providing that it is regularly adjusted and used in accordance with the instructions detailed in this manual. If you should experience any problems which fall outside of the scope of this manual, contact the selling dealer for further details. Like any electro-mechanical product the Chroma-Q is not designed to operate in wet or excessively humid conditions.

If the selling dealer is unable to satisfy your servicing needs, contact A.C. Lighting directly for full factory service:

#### **Product Description**

The Chroma Q will read USITT DMX512 (1990) protocol, which enables individual addressing of each unit. This allows for easy grouping of multiple units. The units are individually addressed by setting the 10 pin binary dip switch (three rotary switchs on M5 & M8), as displayed in the panel views on page 4 and the instructions on page 6 section b.

The Chroma-Q is supplied power and control signals by means of a XLR 4-pin connector. The XLR 4-pin output may then be used to connect other units in turn on the same line. Each chain line must be terminated by connecting the output cable from the last unit in the chain to the corresponding return connection on the PSU / Splitter box, as shown in the System Diagram on page 6

Note: For the optimum performance of a system the Chroma-Q colour changer maximum cable length per distribution line must not exceed 61mtrs. (200ft.) including the return to the PSU / Splitter box.

The Chroma-Q is equipped with an integral cooling fan. Each unit is also equipped with three diagnostic LED indicators (found on the underside of the unit); showing Power, DMX signal and DMX level (see section j - Troubleshooting on page 8 for full details).

#### The Digital Chroma-Q

#### Table of DMX Binary Address Settings 1-128

#### Operation

A summary of Chroma-Q's operations has been divided into the following sections:

- a) Control and Power Cables page 5
- b) Setting the DMXAddress page 6
- c) PSU/Splitter box Options page 7
- d) PSU/Splitter box Capacity page 7
- e) Mounting Position page 8
- f) M5 & M8 Version II Fan Speed page 8
- g) Using Mark I and Mark IIUnitsTogether page 8
- h) SafetyWire-page8
- i) F.C.C. Regulations (USA) page 8
- j) Troubleshooting page 8/9

For gel string dimensions, assembly, loading and calibration - see the separate leaflet enclosed with your Chroma-Q.

#### a) Control and Power cables

The Chroma-Q utilises an XLR 4-pin cable system. This is used to supply power and data transfer. Pins 1 and 4 supply 24VDC power. Pins 2 and 3 supply USITT 1990 DMX512 control protocol with a ground drain wire to the connector shell.

Only genuine Tourflex Data Safe cable is recommended for use with the Chroma-Q colour changing System (see Product Ordering List on page 15).

Damage will occur if the power connections short-circuit to the data or ground / shield connections. When assembling XLR 4-pin cables, heat shrink sleeving should be used on each individual data pin and the drain wire to prevent short circuits.

**Note:** It is very important to ensure that the drain wire from the cable shield is connected to both connector cases.

The cables are wired pin topin, in the following format:

| Pin     | Function           |
|---------|--------------------|
| 1       | 0V DC              |
| 2       | Control Data Minus |
| 3       | Control Data Plus  |
| 4       | Plus 24V DC        |
| Chassis | Ground Bonding     |

### System Diagram

Each PSU / Splitter can accommodate two circuits. The total cable length per circuit must not exceed 61mtrs / 200 ft or a voltage drop will be imposed on the system. The total recommended number of Chroma-Q's of each type must not be exceeded or the system performance will be degraded (see PSU/Splitter Box Options on page 7). The total available current at 24V DC for the connected units is 8.1 Amps peak on the PS08 PSU/ Splitterboxand16.2Amps peak on the PS18/2.

#### b) Setting the DMXAddress

The DMX address for each unit is set using the 10 way binary switch (three rotary switches on M5 & M8) on the back of the unit (see drawings on page 4). The address switches are pushed up (rotated) to the on setting. Add the address together to reach the control address required. Example: 1+2=3, 4+64+256=324.

The Chroma-Q can also be set to a second motor speed. By moving switch 10 on the binary dip switch (DIP 1 on M5 & M8) to the on (up) position, the inherent speed of the Chroma-Q will decrease by approximately 50% (ideal for environments that are particularly noise sensitive).

#### **Product Ordering List**

| DS10  | 3m / 10ft Data Safe 5 pin XLR DMX Cable, Male - Female   |
|-------|--|
| Ds25  | 7.5m / 25ft Data Safe 5 pin XLR DMX Cable, Male - Female |
| DS50  | 15m / 50ft Data Safe 5 pin XLR DMX Cable, Male - Female  |
| DS100 | 30m / 100ft Data Safe 5 pin XLR DMX Cable, Male - Female |
| TP    | 5 pin XLR DMX Termination plug (120 ohm)                 |
|       |  |

Note: cables will be in metric lengths for Europe and imperial in the US

Chroma-Q

#### Chroma-Q PSU/Splitterbox Specification

|        |           | Dimensions |            |             | Power                              |
|--------|-----------|------------|------------|-------------|------------------------------------|
|        | Width     | Height     | Depth      | Weight      | Consumption                        |
| PS08   | 209mm/8¼" | 69mm/2¼"   | 285mm/11¼" | 2kg/4.4lb   | 3.2A max @ 115V<br>1.6A max@230V   |
| PS18/2 | 300mm/12" | 69mm/2¼"   | 281mm/11"  | 3.3kg/7.3lb | 6.4A max @ 115V<br>3.2A max @ 230V |

| Power Requirements:      | 115 / 230V AC (internally switchable, isolate from mains before removing cover). This power supply must be connected to ground (earth)                                   |
|--------------------------|--|
| Protocol Requirements:   | USITT DMX512 (1990)  |
| Body Material:           | Powder-coated Aluminium  |
| Mounting Options:        | Either freestanding or can be hung from a hook clamp (not supplied)  |
| Colour:                  | Black  |
| Circuit Out Connector:   | XLR 4-pin female (power and control protocol)  |
| Return Connector:        | XLR 4-pin male (power and control protocol)  |
| Power Input Connector:   | IEC 320 10A, UL rated  |
| Control Out Connector:   | XLR 5-pin female (DMX link)  |
| Control Input Connector: | XLR 5-pin male (protected with clamping diodes)  |
| European Approvals:      | Complies with EU directives: EMC 89/336/EEC and LVD 73/23/EEC. Harmonized standards applied in order to verify compliance with directives: EN 50081-1 & EN 50082-1: 1992 |
| North Amorican Approvala | Padiated Emissions: Complies with ECC part 15  |

North American Approvals:Radiated Emissions: Complies with FCC part 15, subpart B, class A for unintentional radiators

#### c) PSU / Splitter box Options

The Chroma-Q PSU / Splitter box is available in 2 models: The PS08 is suitable for 8.1 Amps DCmaximum and the PS18/2 is suitable for 16.2 Amps DCmaximum load.

Each Chroma-Q PSU / Splitter box is equipped with the following:

Red 24 volt DC power indicator
 Green DMX signalindicator
 DMX 5 pin input and thru sockets
 2 x XLR 4-pinoutput sockets
 2 x XLR 4-pinreturn sockets
 IEC 320 AC mains input socket

The purpose of the PSU / Splitter box is to combine the DMX control signal and the 24VDC power into individual outputs. There are two output circuits for distribution on each PSU / Splitter box, each is capable of supplying power and data for the Chroma-Q range of colour changers. The maximum cable length, including the return, for the circuit is 61mtrs. / 200 ft. on the PS08 and PS18/2.
Each output must be connected back to its own return. The reason for the return socket

Each outputmust be connected back to its own return. The reason for the return socket is to increase the size of the power cable to reduce voltage loss in each circuit and to provide DMX signal termination.

The PS08 PSU / Splitter box has two circuits and produces 24VDC at 8.1 Amps maximum output. The power consumption is approximately 3.2 Amps at 115V AC or 1.6 Amps at 230V AC. The PS18/2 PSU / Splitter box has two circuits and produces 24VDC at 16.2 Amps maximum output. The power consumption is approximately 6.4 Amps at 115V AC or 3.2 Amps at 230V AC. They will supply the total number of Chroma-Q colour changers listed in the table below through one or two circuits.

To change the operating voltage on the PS08 - PS18/2 PSU / Splitter box, first isolate the unit from the mains supply, then remove the main body cover by unscrewing the two Phillips screws on each side of the cover. Locate the red voltage selector on the side of the silver PSU module, two modules in the PS18/2. Slide the selection switches to the desired setting and refit the cover using the four screws.

#### d) PSU / Splitter box capacities

|          | PS08 | PS18/2 |
|----------|------|--------|
| Chroma-Q | 8    | 16     |
| Broadway | 12   | 24     |
| M1       | 7    | 14     |
| M2       | 7    | 14     |
| M5       | 6    | 12     |
| M8       | 7    | 14     |

#### e) Mounting Position

TheChroma- $\overline{Q}$  is designed to bemounted in an upright position with the base of the unit below the fixture. Do not mount in an inverted position with the base of the unit above the fixture, as the rising heat from the fixture may cause gelstringdamage.

A large number of mounting plates are available for the CQ1D, Broadway, M1 & M2. There are mounting frames to fit the M5 & M8 to popular lanterns. Please contact your dealer for a full list.

Always ensure that the Chroma-Q is powered before the fixture and that you reverse the procedure at the end of the show. Failure to do so may cause gel string damage.

# f) M5 & M8 Version II Fan Speed

The fan speed of the M5 & M8 version II is adjustable. Dip switch 2 & 3 set the speed, see the drawing on page 4 and settings below.

Dip 2 off, 3 off - high Dip 2 off, 3 on - medium high Dip 2 on, 3 off - medium low Dip 2 on, 3 on - low

# g) Using Mark I and Mark II Chroma-Q CQ1's Units Together

Mark I and Mark II units can easily be used on the same show. To do this, calibrate the Mark I units first and last frames to the same frames of the Mark II units.

# h) Safety Wires

Thesafety wire supplied with your Chroma-Q should always be used.

# i) F.C.C. Regulations (USA)

This device complies with part 15 of the F.C.C. rules. Operation is subject to the following two conditions:

- (i) This device may not cause harmful interference, and
- (ii) This device must accept any interference that may cause undesired Operation

# j) Troubleshooting

Troubleshooting of a Chroma-Q is aided by the indications provided by the 3 diagnostic LED's visibly through the Chroma-Q body. All troubleshooting procedures should begin with a LED check.

Thepower supplies are designed to shut down if their outputs are shorted. They will not reset until the AC supply has been disconnected and reconnected. The power supply redLED is an indicator of output voltage not input voltage.

Note: A high percentage of problems are caused by corrupt DMX control protocol. We highly recommend the use of genuine Tourflex DataSafe cables for all Chroma-Q colour changer and DMX control protocol cables.

| Address:                  | 10 way binary dip switch address up to 512 channels   |
| Power Requirements:       | 24V DC  |
| Power Consumption:        | 1.1 Amperes peak at 24V DC with dip switch 10 to On<br>1.5 Amperes peak at 24V DC with dip switch 10 to Off   |
| Protocol Requirements:    | USITT DMX512 (1990)   |
| Body Material:            | Powder-coated Aluminium   |
| Mounting Plate:           | Mounting plates are available to suit numerous fixtures (see separate price list for current selection)   |
| Colour:                   | Black   |
| Input Connector:          | XLR 4-pin male (power and control protocol)   |
| Output Connector:         | XLR 4-pin female (power and control protocol)   |
| European Approvals:       | Complies with EU directives: EMC 89/336/EEC Class<br>A. Harmonized standards applied in order to verify<br>compliance with directives: EN 56022:1994, EN 50082-<br>1: 1992 & EN 60950 |
| North American Approvals: | Radiated Emissions: Complies with FCC part 15<br>subpart B, class A for unintentional radiators.Low<br>Voltage Directive: Complies with CSA 22.2 950, UL<br>1950                      |

| Symptom  | Possible Cause  | Solution  |
|--|---|---|
| All Chroma-Q's show no<br>power indicator (Red<br>LED).                    | 24V DC power supply is<br>not providing power to<br>Chroma-Q.   | Check if the mains power<br>to the PSU is ok and the<br>red 24VDC LED is on.  |
| Single Chroma-Q power indicator is off (Red LED).                          | Electronics fault in Chroma-Q.  | Call selling dealer.  |
| Power indicator light is flashing. (Red LED).                              | Gel string is jammed.   | Readjust or replace faulty<br>gel string and / or turn<br>power off and then on again.<br>This will reset the unit.   |
| Chroma-Q has dim power light (Red LED).                                    | Voltage has dropped below acceptable level.   | Check that the return line<br>has been installed. Check<br>maximum cable length has<br>not been exceeded.   |
| DMX indicator on all<br>Chroma-Q are off (Green<br>LED).                   | No DMX is present at the PSU/ Splitter box.   | Check that the DMX cable<br>is properly connected to<br>DMX input on the PSU /<br>Splitterbox. Check that DMX<br>indicator light, located on<br>the PSU/Splitterbox, is on. |
| DMX indicator light on one<br>group of Chroma-Q's are<br>off (Green LED).  | One output of the PSU /<br>Splitterbox has failed.<br>Faulty first XLR 4-pin cable<br>at Splitter box output. | Call selling dealer.<br>Test cables.  |
| Level indicator does not<br>respond to DMX control<br>signal (Yellow LED). | Improper address.   | Reassign unit addressing.   |
| Level indication changes<br>intensity, but gel string<br>does not move.    | Mechanical failure.   | Call selling dealer.  |
| No power from PSU, but<br>AC is OK.  | Cable short has shut down<br>PSU / Splitter box.  | Remove all cables from the<br>Splitter box allow 30<br>seconds to reset, reconnect<br>AC supply and test. Check<br>cables for shorts  |

#### Limited Warranty

Your Chroma-Q colour changers and PSU / Splitterbox are covered by a 12 month warranty against defects in manufacture. The warranty covers parts and labour but excludes the cost of freight. In the case of any warranty claims, please contact your selling dealer. If the selling dealer is unable to assist you, please contact A.C. Lighting directly at the appropriate address as detailed on page 3.

# Chroma-Q Colour Changer Specification (CQ1/D)

| Dimensions:               | 285mm (w) x 295mm (h) x 89mm (d)<br>11 ¼" (w) x 11 5/8" (h) x 3 ½"(d)   |
|---------------------------|---|
| Aperture:                 | 171mm / 6 ¾" diameter   |
| Weight:                   | 2.04kg / 4.5lb (without mounting frame)   |
| Gel Frame Capacity:       | between 2 - 16 frames   |
| Speed:                    | 1.5 seconds with dip switch 10 to Off   |
| Speed 2:                  | 3.2 seconds with dip switch 10 to On  |
| Address:                  | 10 way binary dip switch address up to 512 channels   |
| Power Requirements:       | 24V DC  |
| Power Consumption:        | 0.6 Amperes peak at 24V DC with dip switch 10 to On 0.9 Amperes peak at 24V DC with dip switch 10 to Off  |
| Protocol Requirements:    | USITT DMX512 (1990)   |
| Body Material:            | UL94 V0 rated reinforced PBT compound   |
| Mounting Plate:           | Mounting plates are available to suit numerous fixtures (see list on page 15 for current selection)   |
| Colour:                   | Black   |
| Input Connector:          | XLR 4-pin male (power and control protocol)   |
| Output Connector:         | XLR 4-pin female (power and control protocol)   |
| European Approvals:       | Complies with EU directives: EMC 89/336/EEC Class<br>A. Harmonized standards applied in order to verify<br>compliance with directives: EN 56022:1994, EN 50082-<br>1: 1992 & EN 60950 |
